

MEMORANDUM

SUBJECT: Proposed Remedial Action Plan for  
Ordot Landfill, Guam

FROM: Jeff Zelikson  
Director, Toxics & Waste Management Division

TO: Addressees (See Attached List)

Attached for your review and comment is the Proposed Remedial Action Plan (PRAP) for the Ordot Landfill in Guam. The PRAP summarizes the remedial investigation and evaluates potential threats to human health and welfare and the environment from contaminants at the site. The PRAP recommends No Further Action as the preferred alternative.

A Record of Decision (ROD) will be written based upon the PRAP and the comments received from the public, Guam, and EPA program offices. A final ROD document will be routed through the program offices for concurrence and to the Regional Administrator for signature.

I would like to remind you that in accordance with EPA's policy regarding CERCLA Compliance with other environmental statutes (50 FR 47946, November 20, 1985), it is EPA's policy to select a remedy that complies with all applicable or relevant and appropriate federal environmental laws. Please review the discussion of the different remedial action alternatives closely with respect to their compliance with the applicable or relevant and appropriate federal environmental laws administered by your program office.

Any questions regarding the site and the Superfund process can be directed to Rick Sugarek of my staff at 4-8230. Comments concerning the PRAP should be submitted to Rick Sugarek (T-4-3) by August 12th or sooner if possible. Thank you for your cooperation.
